

How to Connect to RStudio Server

In this tutorial, we will guide you on how to connect to an RStudio Server using any web browser.

Step 1: Open Your Web Browser

1. Launch any web browser of your choice (e.g., Chrome, Firefox, Safari, Edge).

Step 2: Enter the RStudio Server URL

1. In the address bar, type the URL of the RStudio Server you want to connect to. The URL format typically looks like this:

`http://<hostname>:<port>`

Replace `<hostname>` with the server's hostname or IP address and `<port>` with the port number (default is usually 8787).

Example:

Figure 1: Enter RStudio Server URL

Step 3: Log in to RStudio Server

1. Once the RStudio Server page loads, you will be prompted to enter your credentials.
2. Enter your **username** and **password**.

3. Click the **Sign In** button to proceed.

Step 4: Explore the RStudio Environment

1. After logging in, you will see the RStudio interface.
2. You can now create, edit, and manage your R scripts and projects.

Step 5: Sign Out

1. When you are finished, it's important to sign out to protect your account.
2. Click on your username in the top-right corner and select **Sign out**.
